Overview

I am a full-stack web developer with a bent on growth.
My passion is building products that people connect with on a daily basis.
My goal is to focus on both conversion rates and the user experience.

Specialties

Ruby on Rails, Javascript, jQuery, HTML, CSS, MySQL

Experience

Thinkful   2012-2013
Consultant
- I remotely implemented the site redesign and several lead gen landing pages.

Sales4Startups   2012—2013
Mentor & Speaker
- I joined a team of passionate technology entrepreneurs who love to share their insights around the topic of sales. We conducted evening sales seminars and training for startup companies.

Fileboard   2011-2013
Director of Marketing
- I developed Fileboard's product messaging, value propositions, product overviews, white paper, newsletter and marketing strategy. I also conducted demonstrations, webinars, and analysis on pricing and competition.

Ace Metrix   2011
Analyst
- I was responsible for operations including data management, analytics, content review, and survey deployment.

AOL   2006-2008
Social Media Consultant
- I landed my first gig ever in high school. User growth and content for Netscape.com portal relaunch. I generated content and helped admin the 500,000+ user community.

Education

Dev Bootcamp   2013
10-week web development apprenticeship. Full stack web development.

University of Illinois at Urbana-Champaign   2007—2011
B.A. in Communication; Concentration GPA 3.5/4.0
